

# Swarovski Zirconia Collection

# Basic Information

# What is Zirconia?

Zirconia is an artificially produced crystalline imitation of a diamond made of Zirconiumoxide, which is very hard and is characterized by a light refraction that is close to that of a diamond.

Zirconia is considered the best diamond imitation in the market.

Zirconia can withstand very high temperatures (2750°C) and can therefore be set like a diamond.

Zirconia can be applied to jewelry without the need for adhesives, making it extremely durable and ideal for everyday wear.

## TRUST THE ORIGINAL

Swarovski was the first company to recognize zirconia's full potential and expanded its expertise in precision cutting to the manufacture and supply of machine-cut zirconia already in 1976 – a first for the international jewelry industry.

Following its pioneering spirit, Swarovski started to set the industry standards for product quality, reliability, innovations, and corporate social responsibility, as well as trend and design initiatives

## COMPARATIVE ANALYSIS

To demonstrate the supreme optical quality of zirconia, the following table compares our created stones with their natural counterparts.

Material	Zirconia	Diamond	White Topaz	Crystal
Refractive index	2.2	2.42	1.62	1.52 – 1.58
Dispersion (CF)	0.065	0.044	0.014	0.009 – 0.098
Hardness (Mohs)	8.5	10.0	8.0	5.0 – 6.0
Specific Gravity	5.6	3.53	3.54	2.7 – 3.3

Basic Information

## PACKAGING AND LABELING

We take great care and pride in the handling and packaging of our exclusive products. The individual construction of our packaging allows for stacking, while the unique see-through design enables quick and easy identification of the contents. As a guarantee of quality and security, a special seal ensures that your Swarovski product is both original and intact.

### Bar Coding

To guarantee the quality of our products, and to help trace the history of an order, each of our packages is tagged with a unique bar code label.

### Trustseal

Our specially created Trustseal secures each product package and verifies the authenticity of our Created Stones. The complex design of the seal is similar to a hologram, making it virtually impossible to imitate.

### Safety Tab

Our strict manufacturing standards call for dependable security solutions. In order to protect our packages

from tampering, we have developed the Safety Tab – an important new security feature, which is applied at the final stage of packaging. Once broken, the Safety Tabs cannot be reused, giving the customer a clear indication that the package has been tampered with. Should any of our packages be delivered damaged or with broken Safety Tabs, we kindly ask our customers to report the incident to their local sales office as soon as possible. The superior quality of our genuine Swarovski products can only be guaranteed when the Safety Tabs are fully intact. In order to open the packaging, please move the Safety Tabs in the direction of the arrow.

## SWAROVSKI ZIRCONIA COLORS

Color plays a fundamental role in Swarovski's company history and is a constant source of creative inspiration. Thanks to our detailed research and creative expertise, we continually develop exciting new colors.

### Swarovski Zirconia TCF™ Colors

- Thermal Color Fusion (TCF™) is a patented innovative coloration technology that enhances the surface of the stone with an enduring hard-ceramic layer on the pavilion
- TCF™ enables the enhancement and transformation of zirconia with an array of fashion-forward colors
- Patented in Austria
- TCF™ is a special chemical heat treatment that is durable, permanent and resistant
- TCF™ is able to sustain production processes (cast-in-place) and cleaning methods
- As the coloration is restricted to the near-surface of the stone, the body of the stone remains completely unchanged
- Our TCF™ technology does not involve any kind of irradiation and therefore is environmentally and consumer friendly
- TCF™ has a high color consistency regardless of the size and shape of the stone

## SWAROVSKI ZIRCONIA VIBRANCE FAMILY

We aspire to innovate in a way that seamlessly blends past, present, and future. The Vibrance color family is a first of its kind color development in Swarovski Zirconia, a unique combination of two colors in a single stone. Swarovski's patented TCF™ coloring process results in pure, consistent shades from the smallest to the largest stone. Each stone of the Vibrance Family produces a fascinating color effect akin to looking through a kaleidoscope. Whichever way

you look at it, every way you metaphorically 'turn the kaleidoscope' it creates fresh new perspectives. Above all, these constantly changing patterns and hues illustrate how each person and each life is unique, and every special moment deserves to be celebrated. It is both a jewel of a moment and a moment for memorable jewelry that will be admired and deeply treasured for years to come.
